### DETAILED ACTION

1. Upon further review the examiner has decided to further restrict the claims in this application. The previous election/restriction mailed (4/3/02) is withdrawn.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14 are drawn to a method of administering and treating respiratory tract diseases using gamma-interferon, classified in class 424, subclass 557.
  - II. Claims 1,35 and 40-49 are drawn to compositions of gamma-interferon alone or in combinations, classified in class 424, subclass 85.5.

The inventions are distinct, each from the other, for reasons:

Inventions I and II are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition of gamma-interferon alone, or as combined, can be used as pharmaceutical compositions as shown above, or it can be used in a diagnostic method, or as a probe.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. The claims of Groups I are drawn to multiple lung diseases. Singular subject of the different lung diseases is independent and distinct because they have no common

have different disease mechanisms. Accordingly, these different diseases are each subject to restriction under 35 U.S.C. § 121. Regardless of the Group elected, Applicant is additionally required to elect a single disease, which if determined to be patentable, would also be patentably distinct from the other lung diseases.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
